How to Activate MediKey

Compatible with iPhones & iPads. iOS 15 above is required.

What is MediKey?

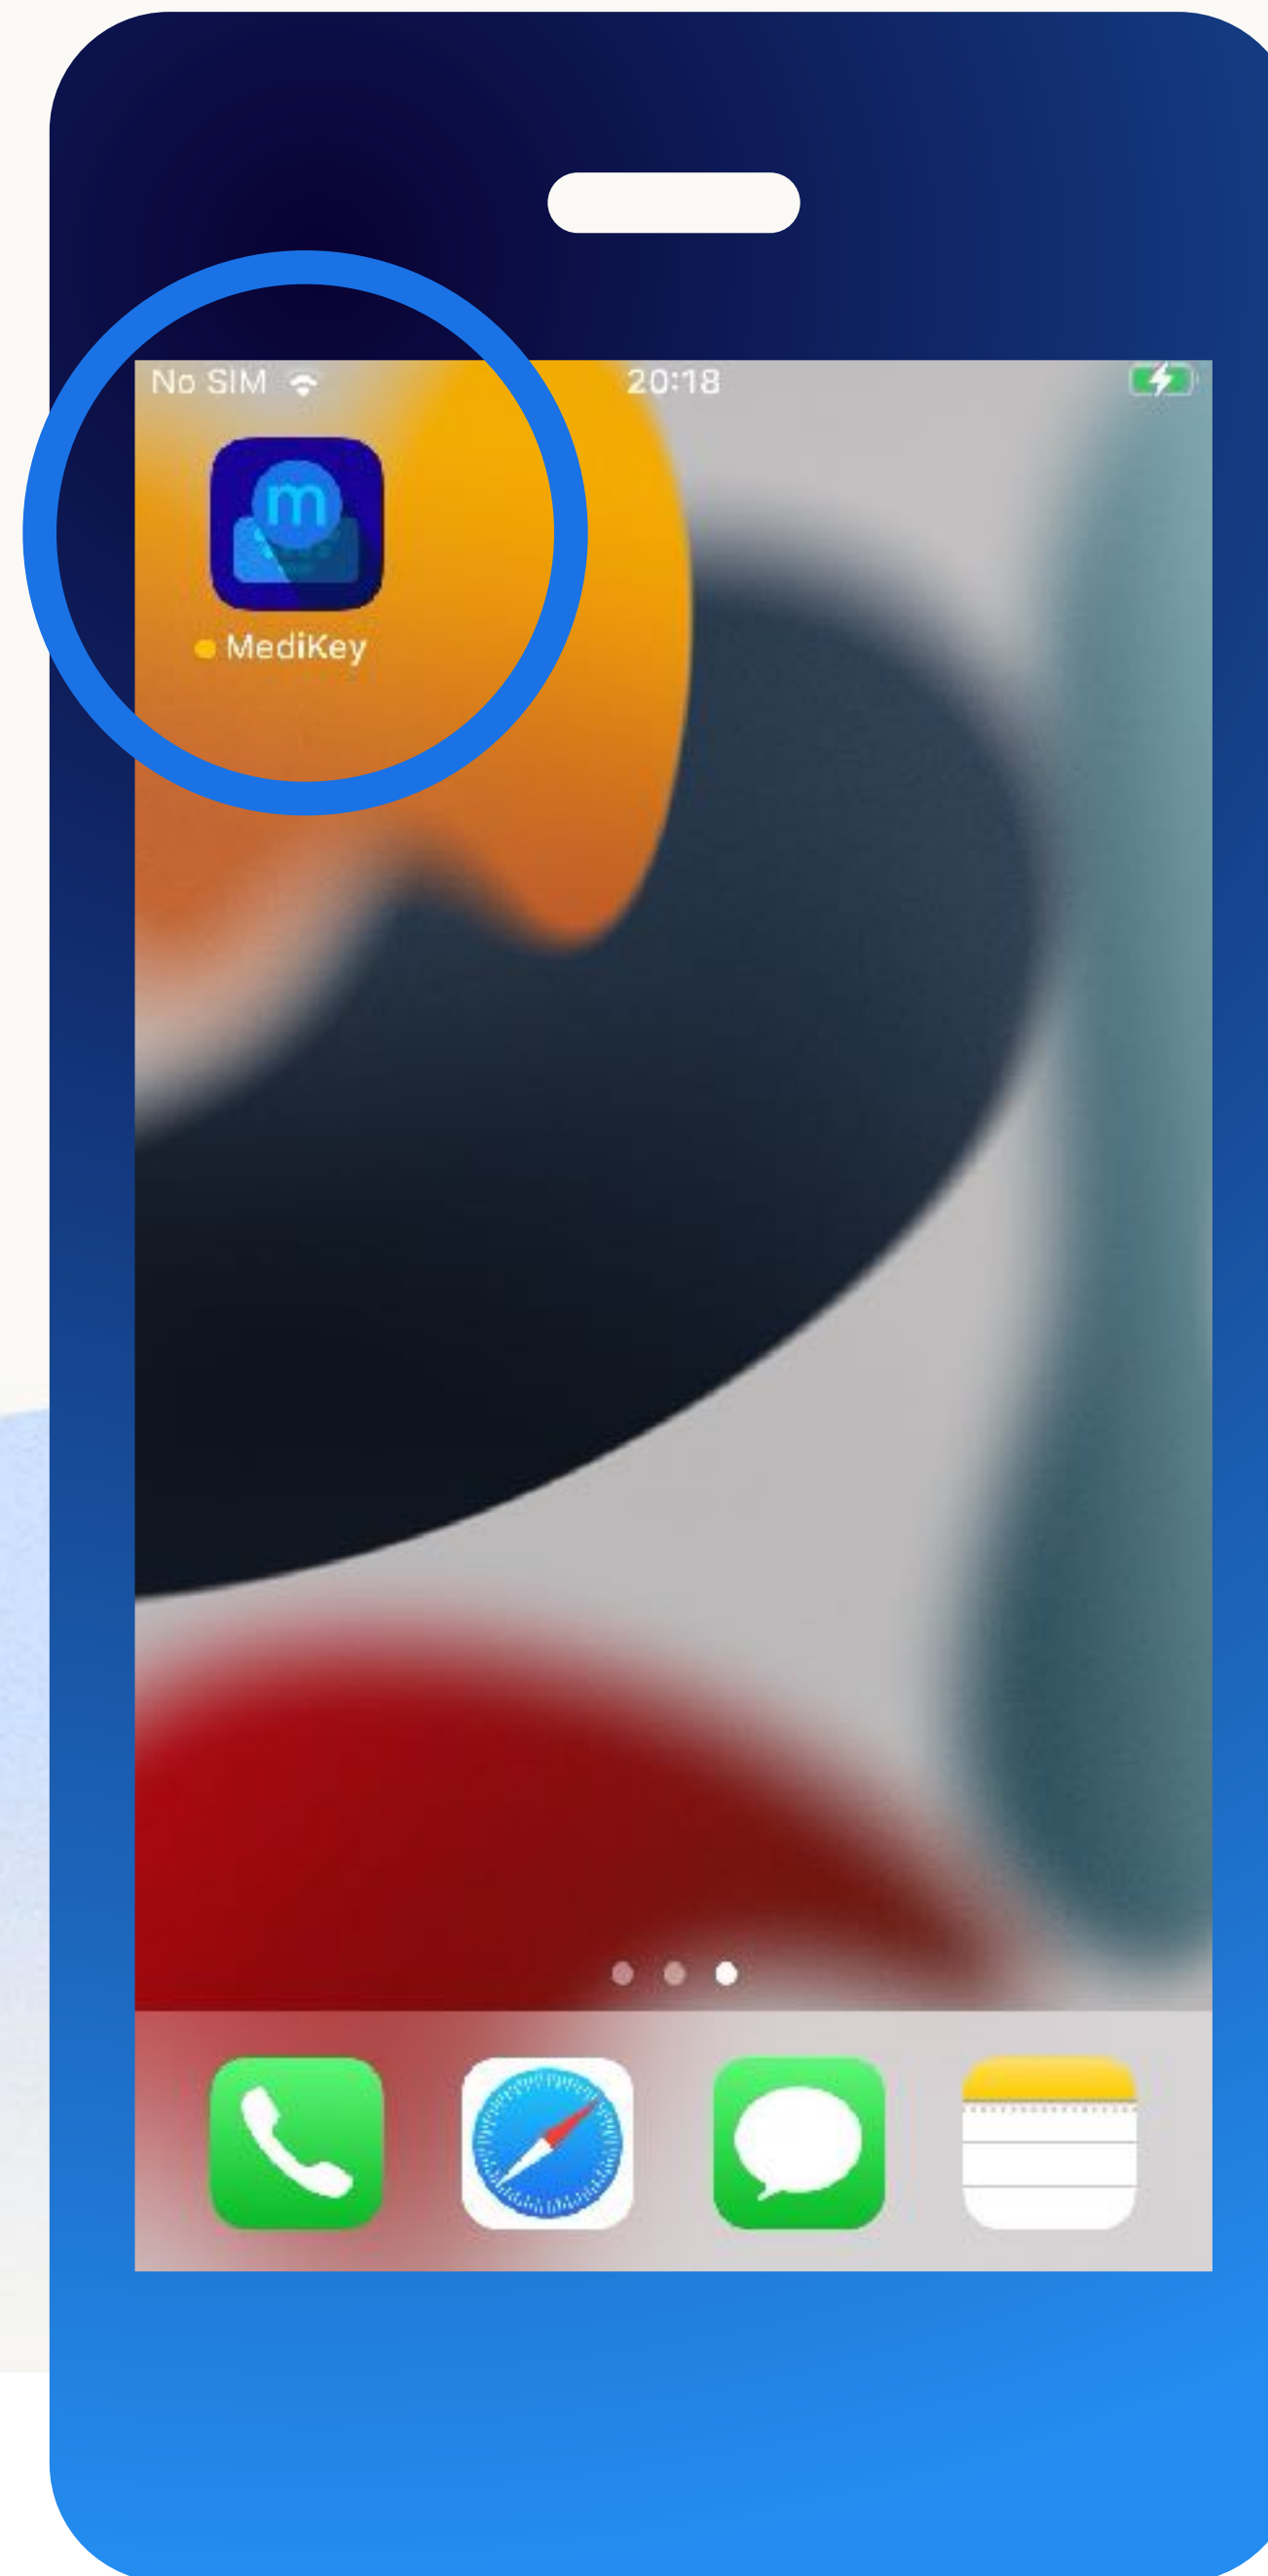

MediKey is a powerful medical keyboard application designed to enhance text communication among healthcare professionals. Compatible with both iPhone and iPad devices, it features an extensive dictionary of 120,000 medical terms by default.

With MediKey, you can significantly increase texting productivity on the move.

MediKey is particularly beneficial in hospital settings, where nurses and doctors can quickly and accurately communicate, reducing miscommunications and improving text quality. This ensures vital information is conveyed efficiently and precisely, essential in fast-paced medical environments.

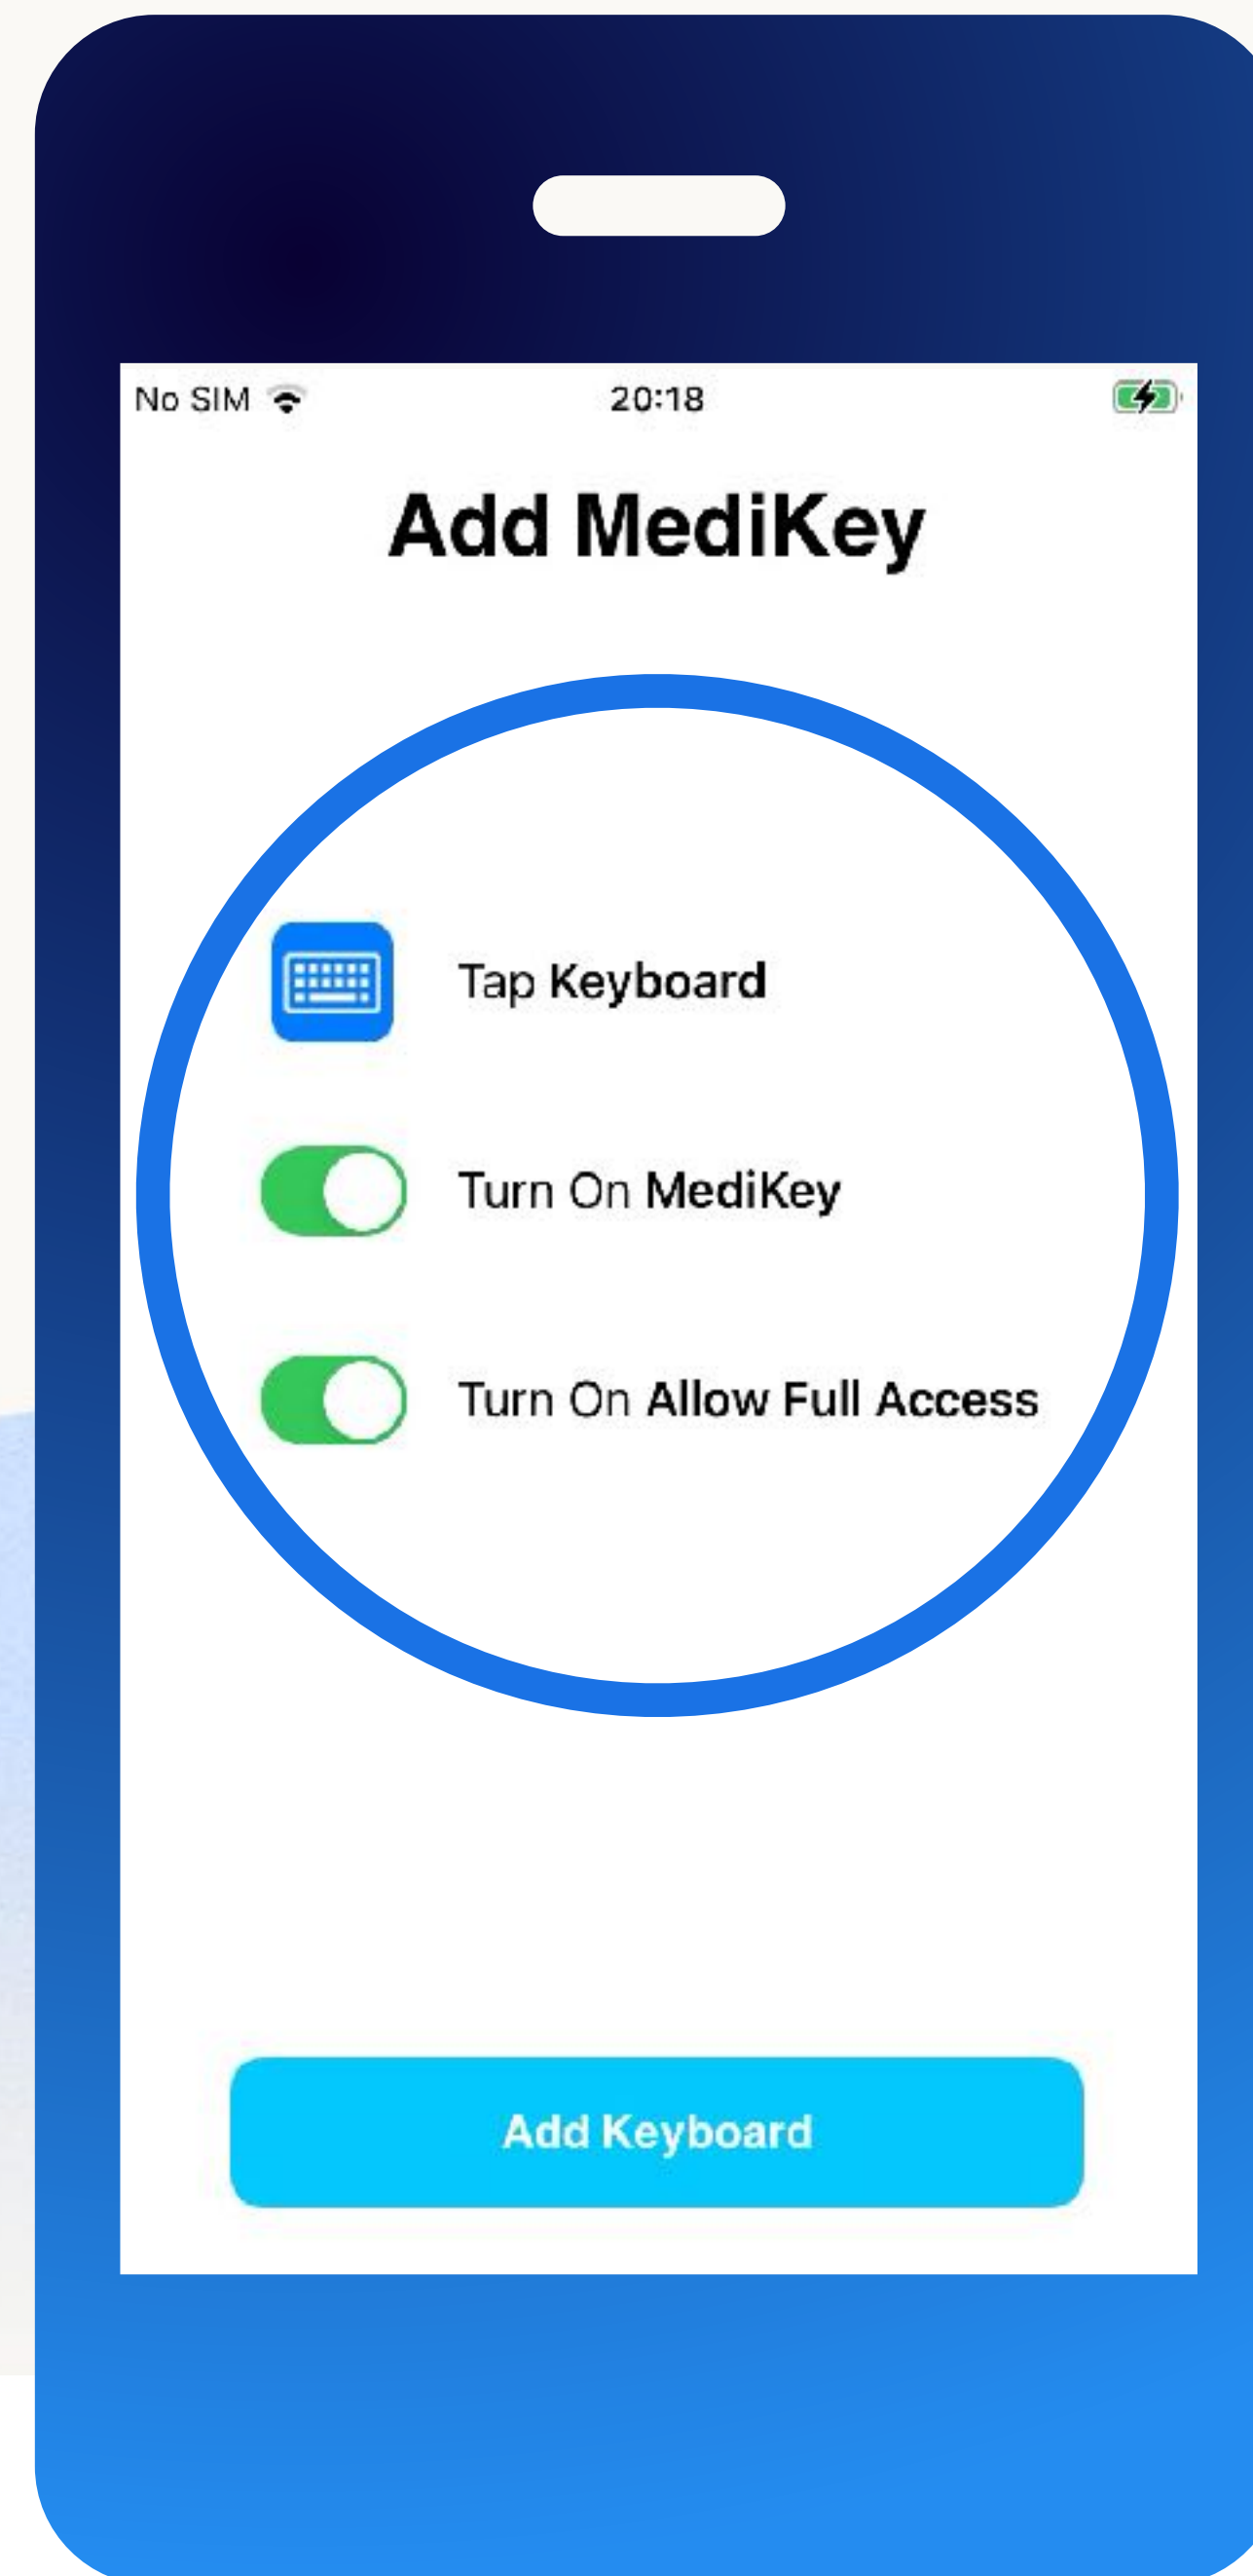

Step 1

Open MediKey App

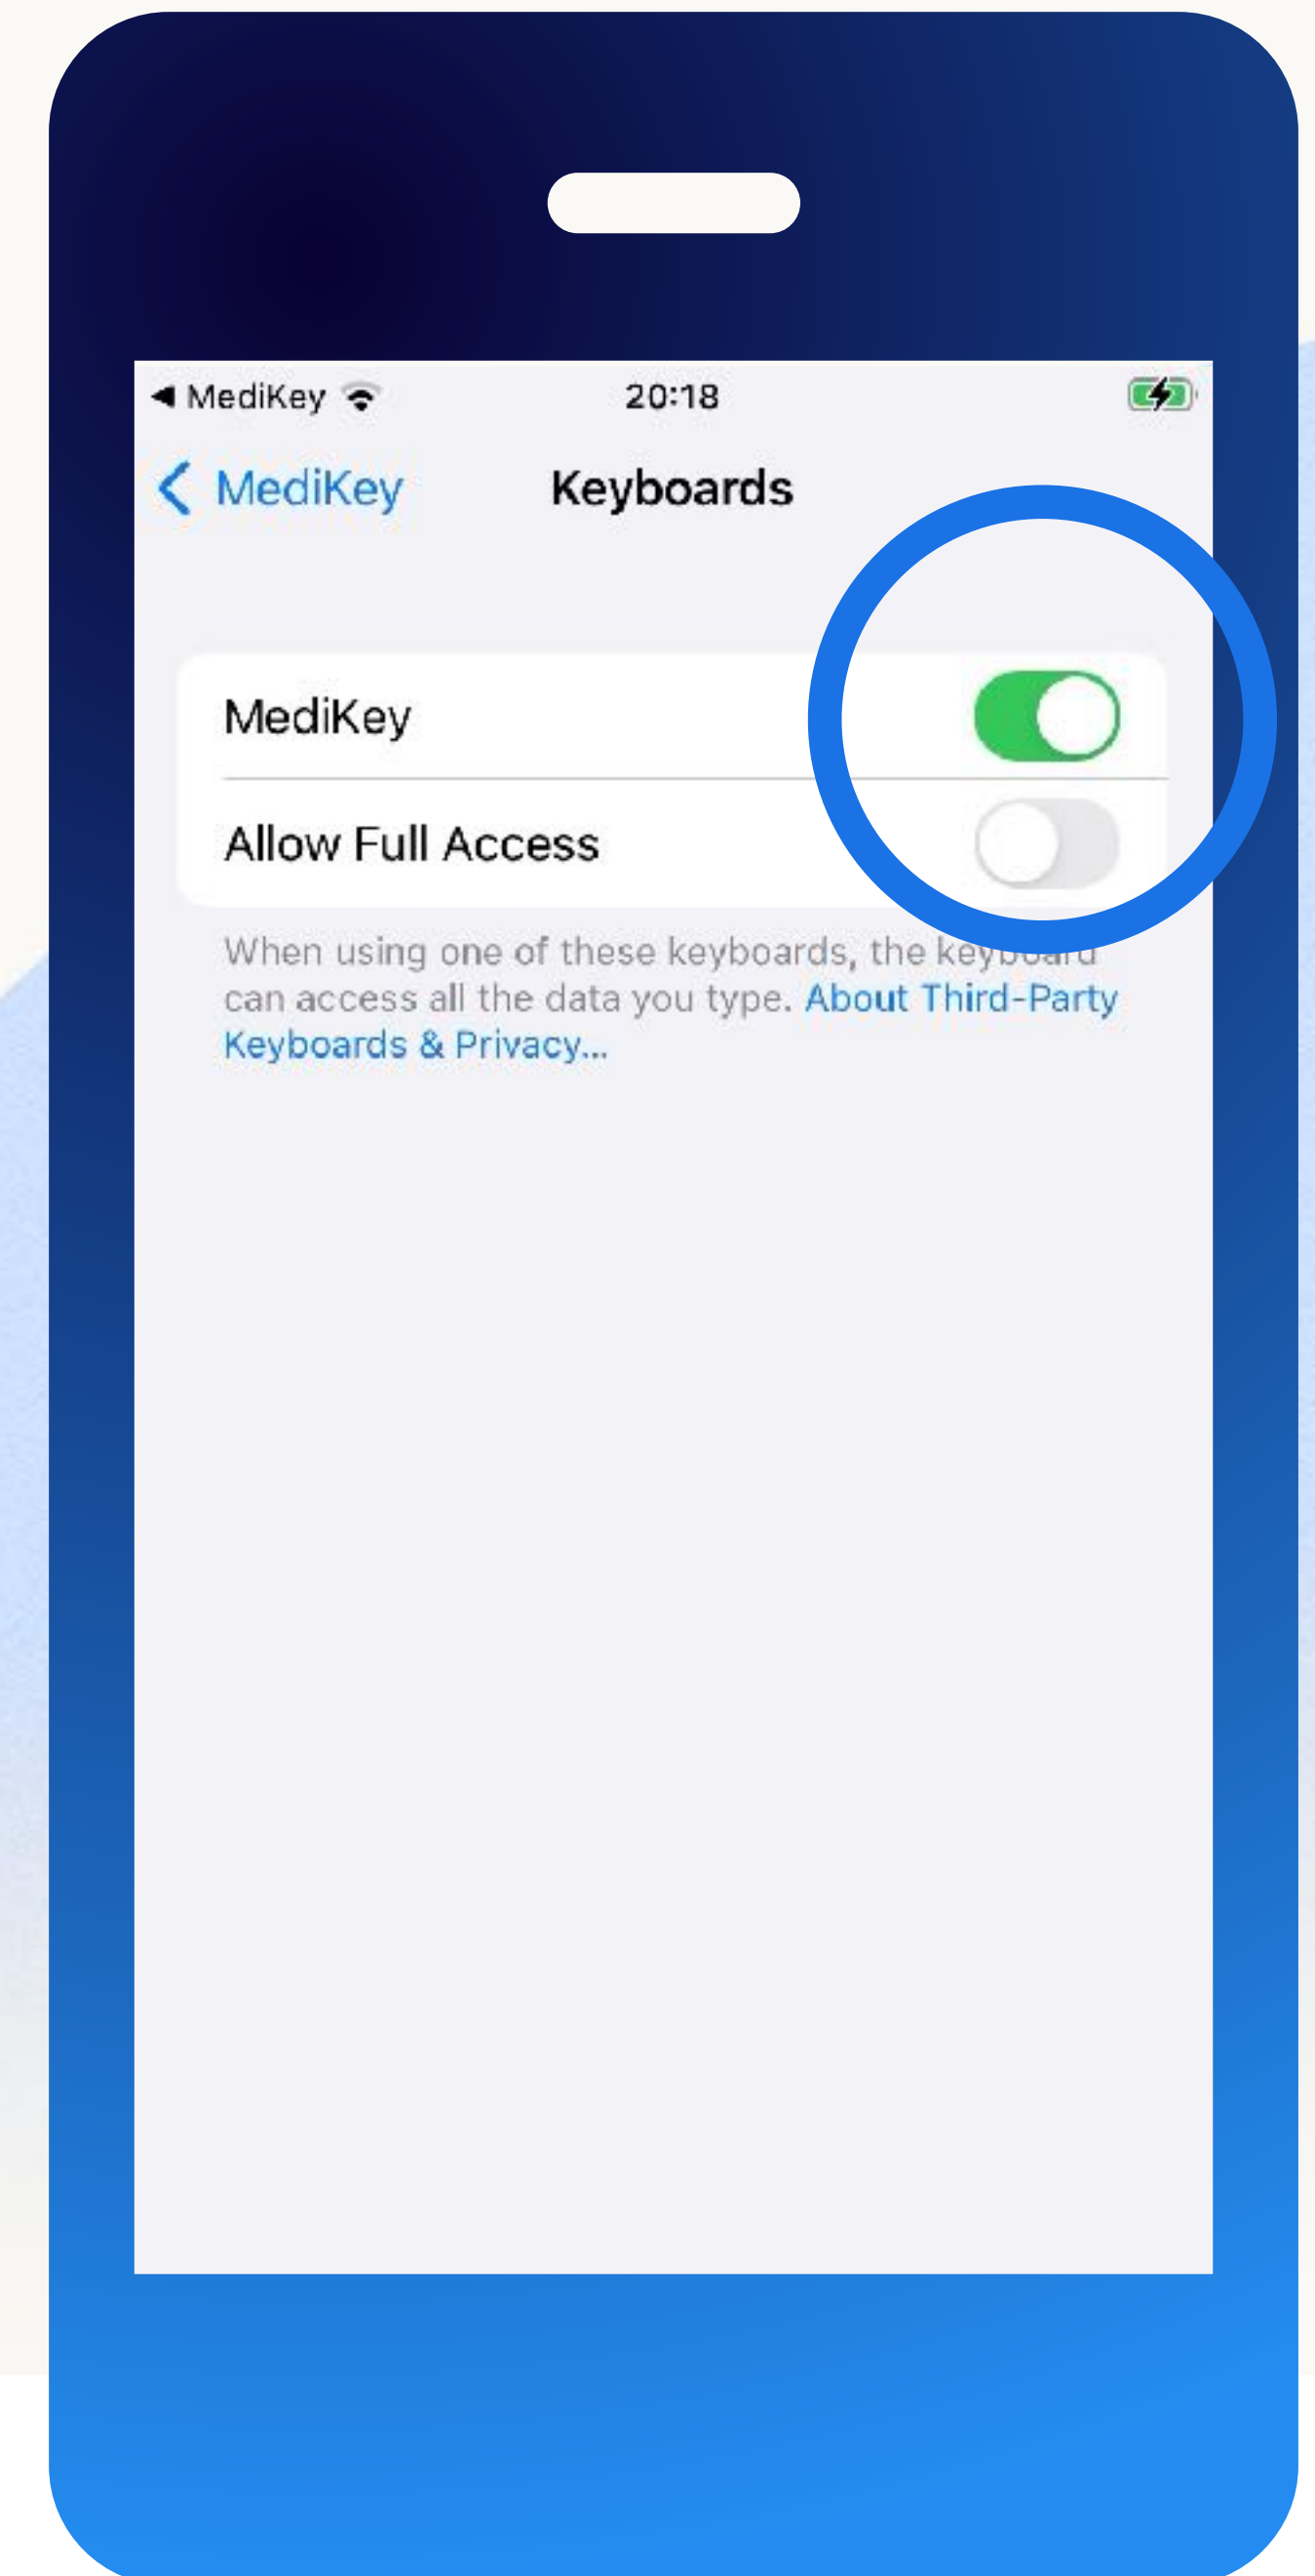

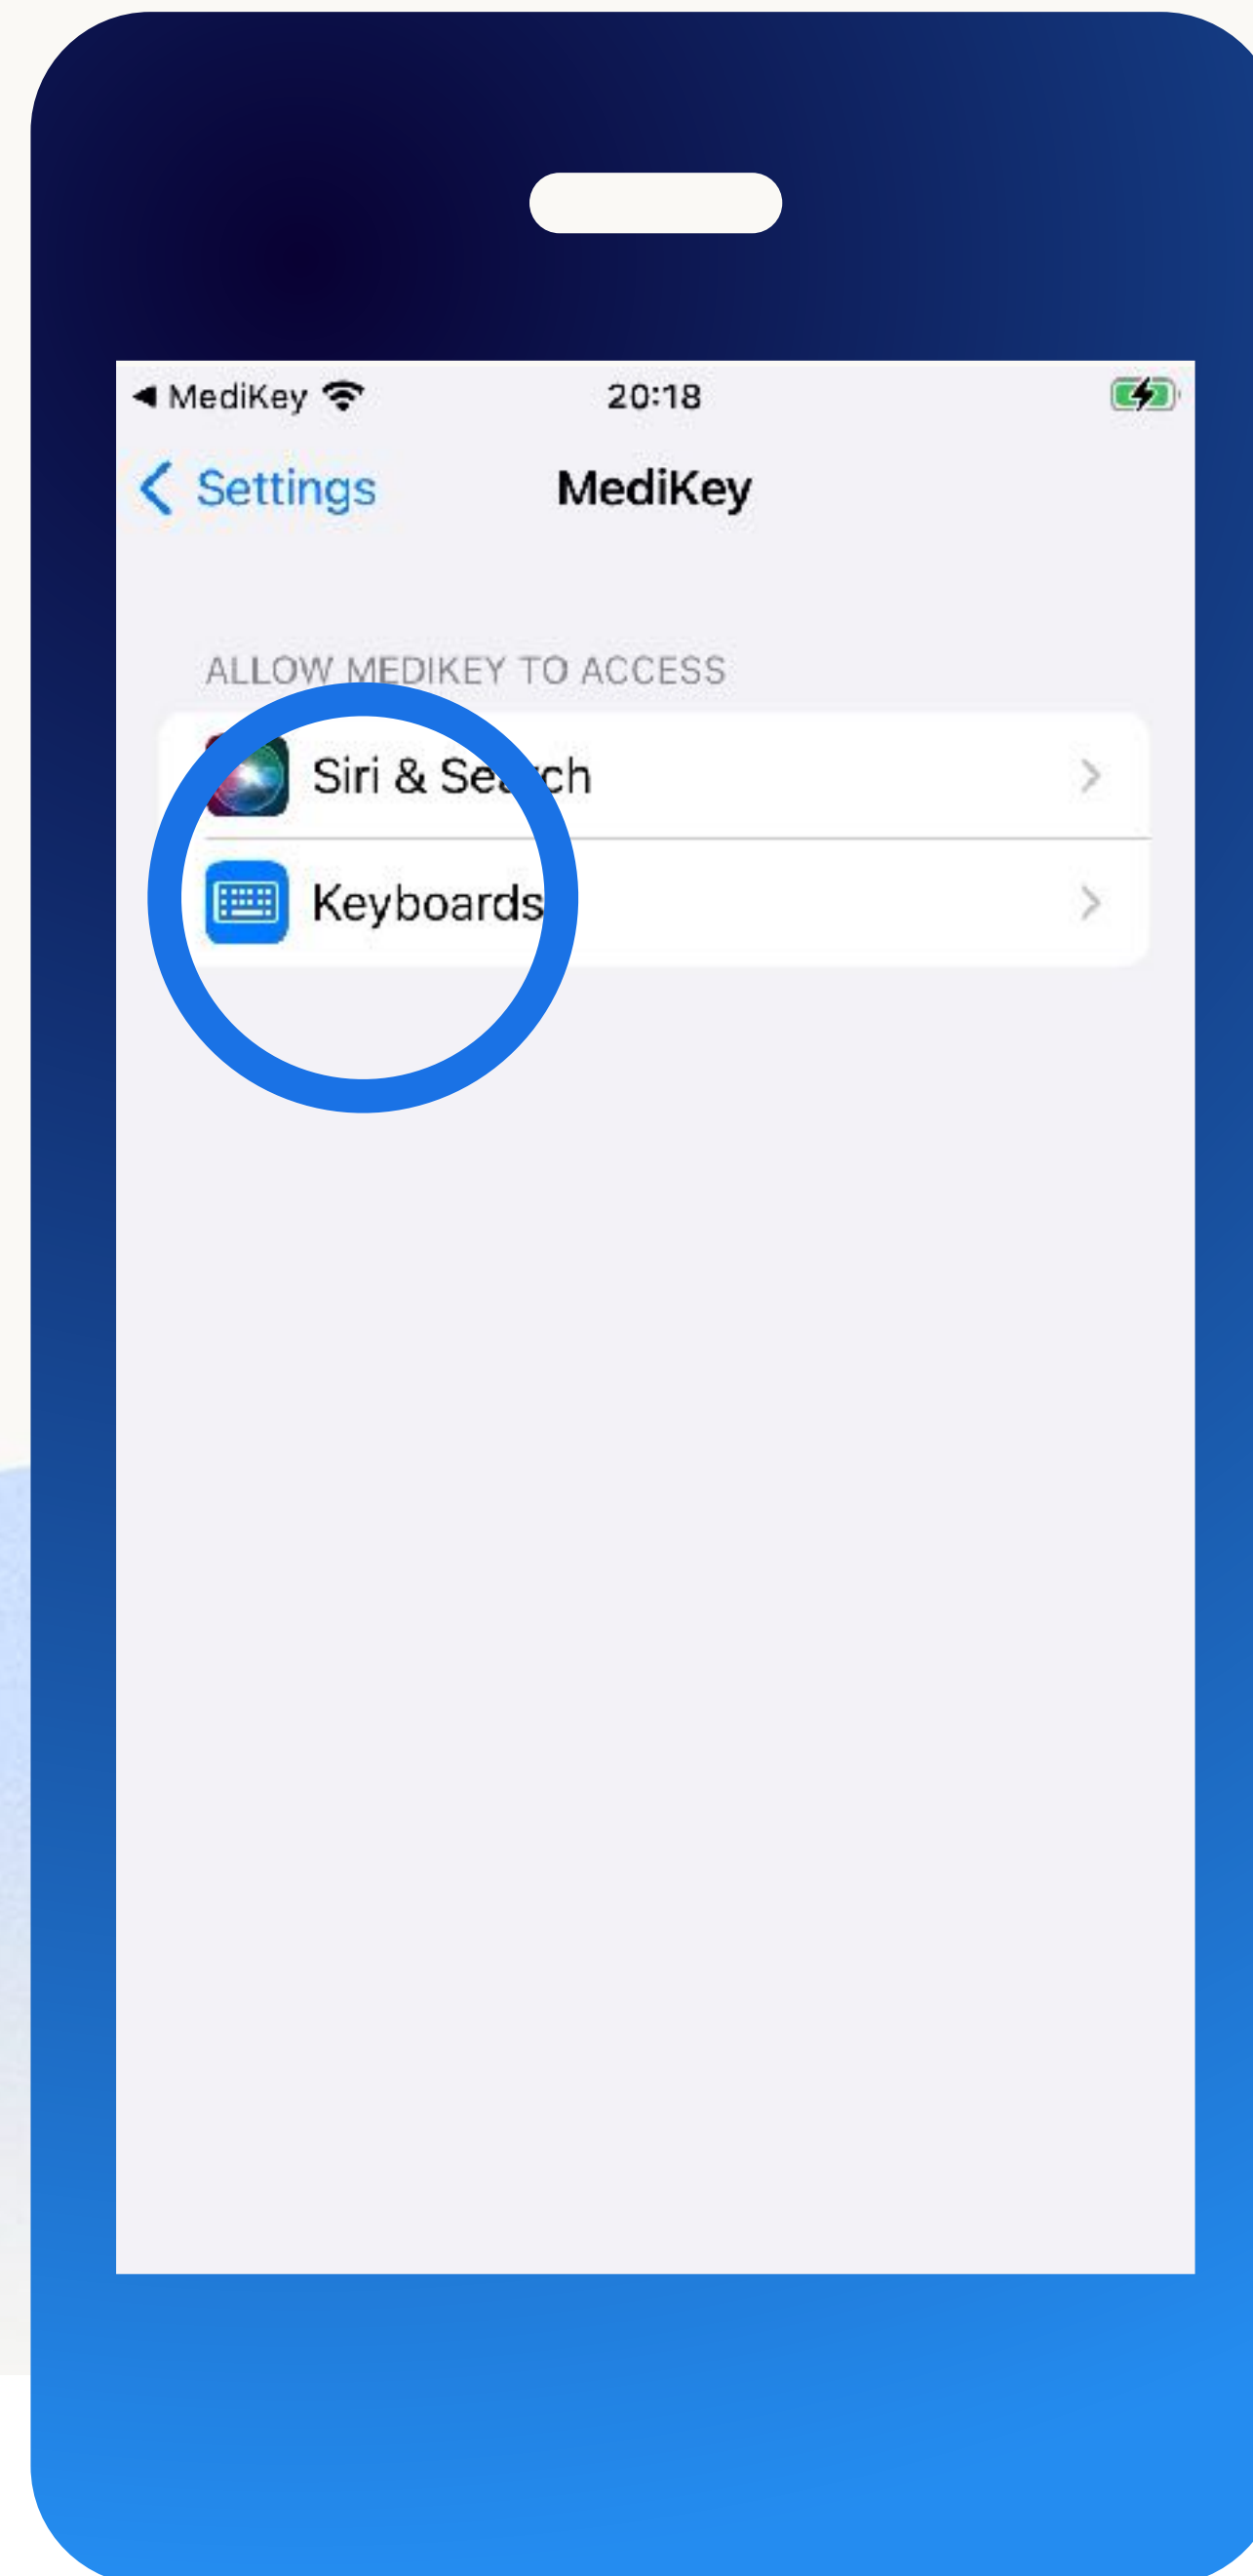

Step 2

Activate MediKey following the 3 steps on-screen

Step 3

Ensure it is active under
Settings > General >
Keyboard

Step 4

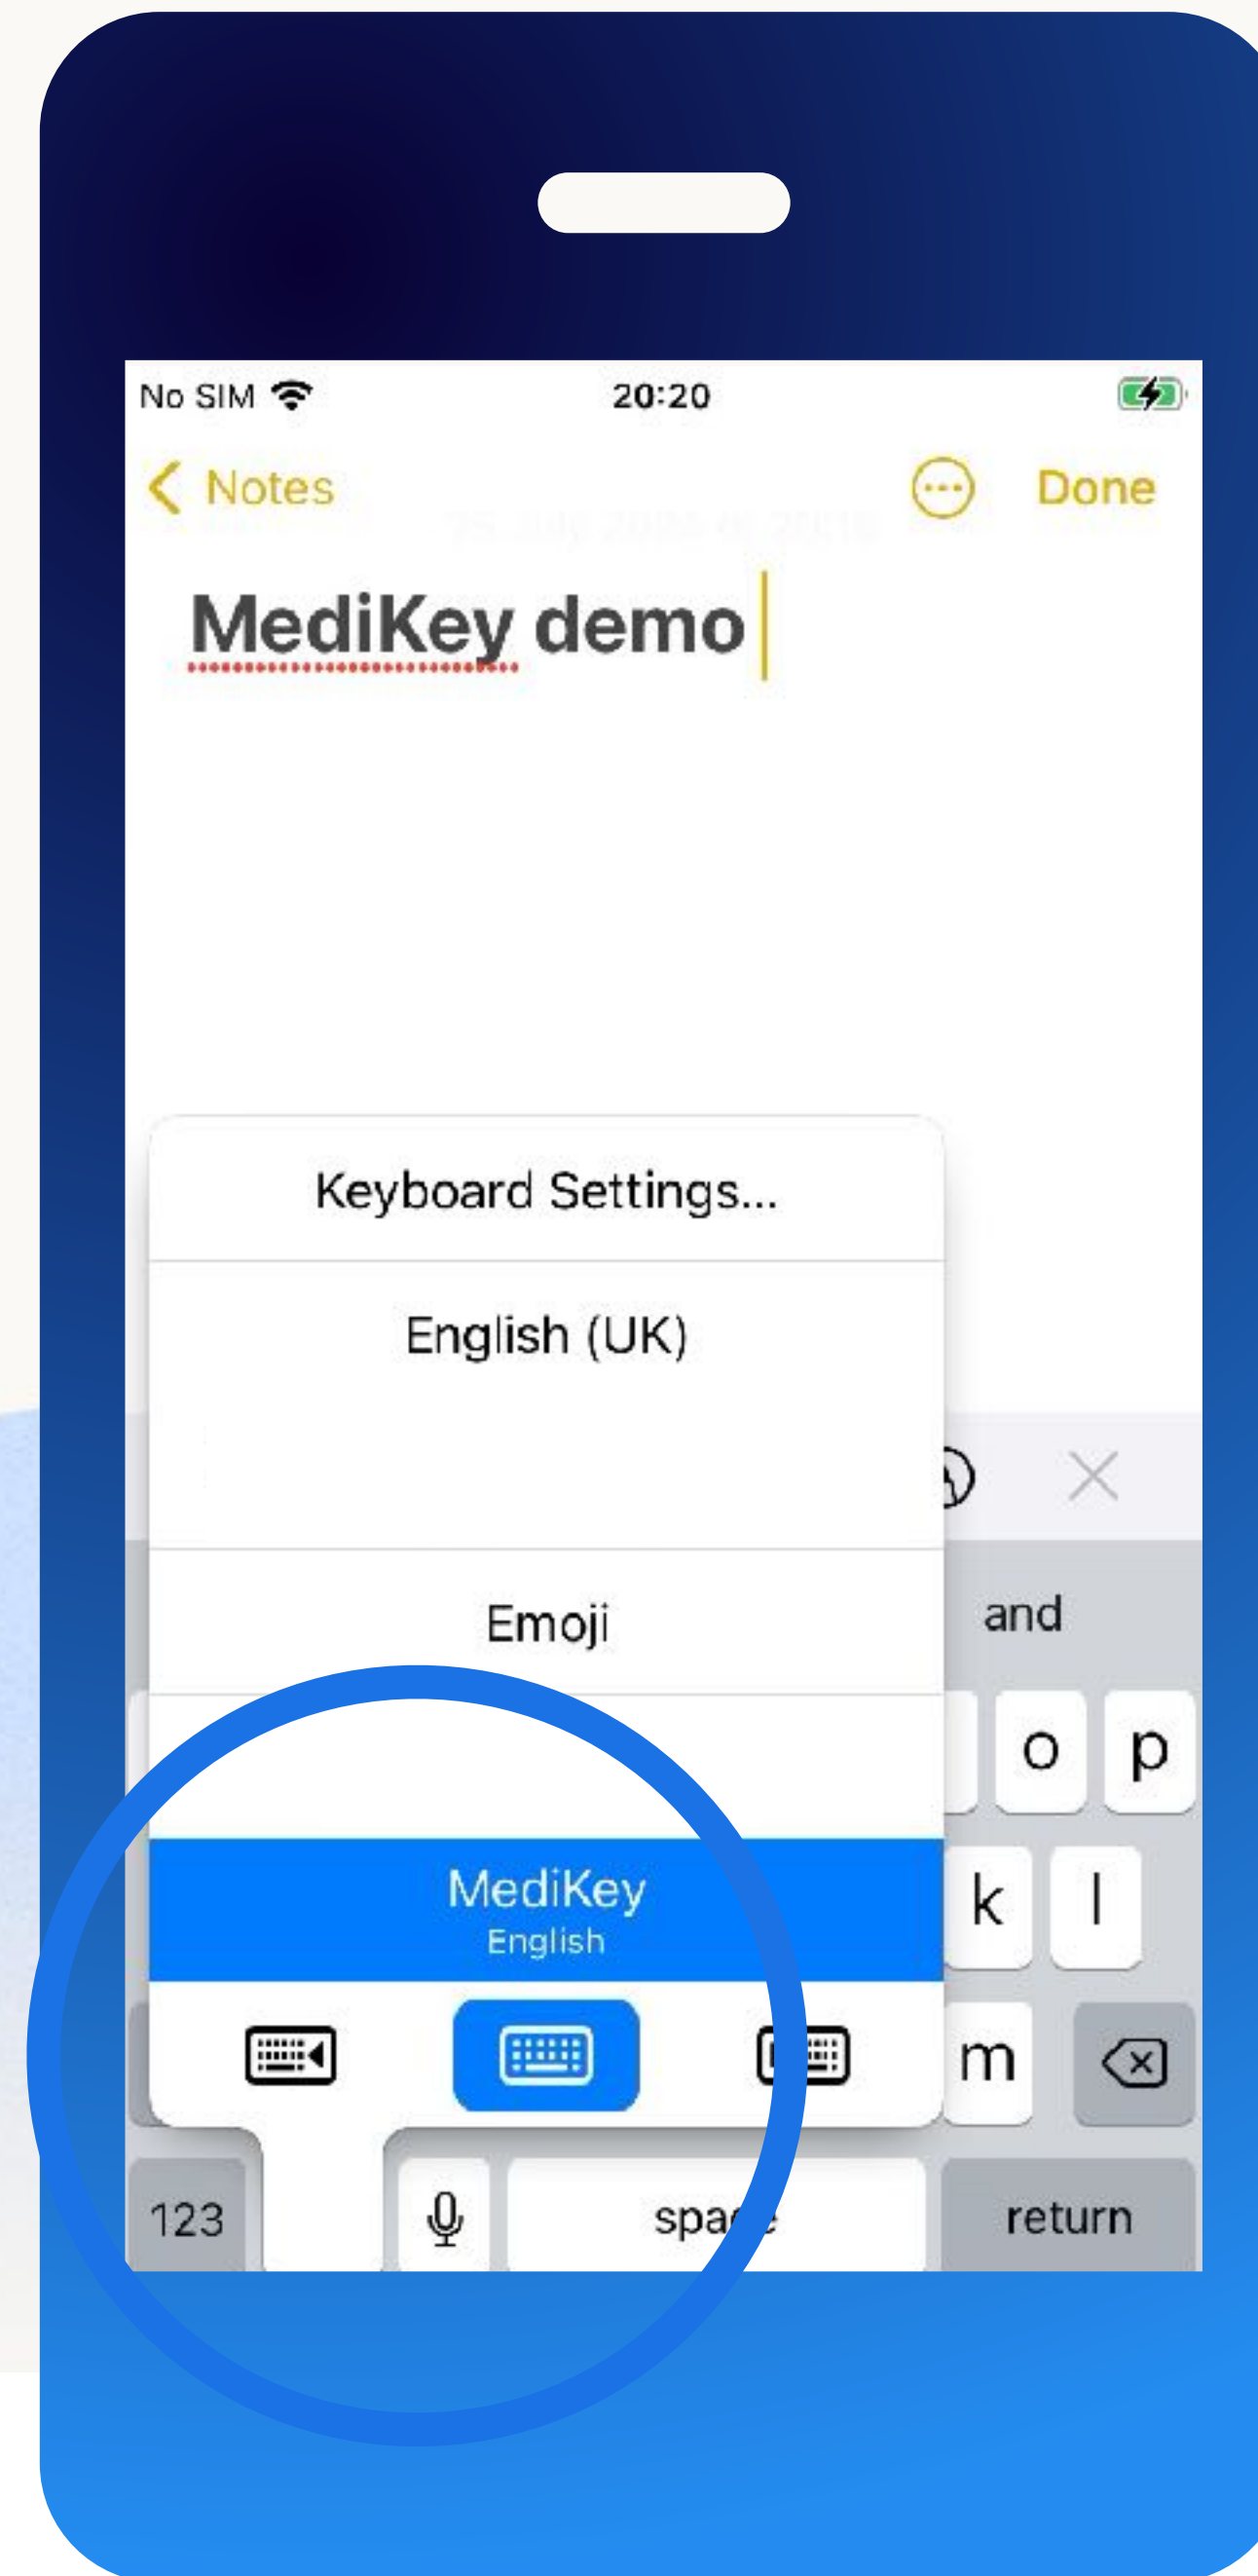

Open your favourite Note
Taking App

Step 5

Tap & Hold the Globe icon
(🌐) on your virtual keyboard

Step 6

Select MediKey
